

## **Meeting minutes for November 30 , 2023**

**Attended. Emmie, Kalyan, Vidhi,Yasmeen, Manushree,Bhavani, Pravallika**

The team discussed about deliverable 5 and the presentation slides and video that has to be done.

The team decided which team members had to join the video and demo as few members had presented the first video.

It was decided that video will be made on Monday.

Then the team ran the medvoyage app and tried to test it and find any bugs.

The team decided that the main agenda for the deliverable 5 was to fix the bugs in the features and to fully complete the features remaining from the deliverable 4.

One of the bugs and issue found while testing the bug was that the appointments for doctor and the time slot selected had to be updated.

The second issue found was to validate the the phone numbers and passwords.

The doctor dashboard showed the patient on the navigation bar,it had to be fixed.

It was decided that team will try to create email and text notifications such that whenever an appointment is made, an email will be triggered.

Team decided that an option will be created for appointment deletion.

In the welcome to doctor dashboard, edit and delete options will be added .

Email triggers will be generated for available slots.

And team decided that it would be made sure that patient would be able to book in the appointment slot and care will be taken that duplicate appointments are avoided, by only showing the remaining available appointment dates so no double booking happens.

The team discussed that user manual was already added on the navigation bar.The team discussed how docker was implemented for medvoyage app.

The team decided that 5-10 unit cases would be performed for the deliverable 5 and system testing would be performed.
