Meeting minutes 10/17/2023

Members attended: Bhavani,Kalyan,Vidhi,Emmie,Yasmeen,MAnushree,Pravallika

The team discussed about the source code of the Medvoyage application, discussed about the different pages like login and sign up page that has to be completed first and how backend for signup and login was to be completed along with the frontend.

The team decided that each member makes branches and commits to their branches rather than committing to the main.

The different sections for the deliverable 3 documentation was discussed.

The team discussed how the team was dividing the uml diagrams, unit test cases ,login page, sign up page .

The team also looked into the peer review feedback and took into consideration the suggestions.

Then the team discussed how the password was going to be validated.

The team discussed about the sequence diagram and the class diagrams needed.

The team discussed on how to create the login page and what to add in the about us page,

The team discussed on what to write in the user manual, and what to include in the screenshots for the user manual.

The team discussed about the unit test cases.

The team discussed on the navigation bar to be included in all the pages.

Meeting minutes for 10/20/2023

The team   discussed about the progress made for the deliverable 3 and as only few team members attended the meeting, it was decided that as changes were being made in the code dynamically, the team decided to discuss and share details through discord for the rest of the week.

The team members sgared and updated their progress and updates continuously through discord and trello board for deliverable 3.
